

# Event Structures

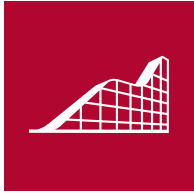

Thought Through to the Last Detail

Sometimes a 27-meter-high diving platform is enough for a successful event. But many events require a whole range of different structures – anything from a bridge to an elegant two story structure for VIP guests.

NUSSLI

FINA Swimming World Championship, Budapest

At NUSSLI, we provide all the event structures for your event from a single source – Media towers, PAs, platforms with or without roofing, stairs, bridges, arches, ramps, or a video wall for your big show. We build all types of special structures, rental event structures, and work behind the scenes to ensure that your event makes a positive, lasting impression on guests.

## Services for your Event

The NUSSLI event structures can be combined with each other and can be built and equipped according to your requirements.
